

*Focus on expertise
 and innovation to realize
 solutions which make
 a real difference*

Our Mission is to provide complete SOLUTIONS for pneumatic movement, designed and realized to satisfy the needs of each single customer, focusing on innovation, operative efficiency and total quality. Camozzi Automation's experienced technicians allow us to offer special solutions, pre-mounted kits, system and cabinets designed and produced according to customer requirements. The quality of our products is ensured throughout,

due to the procedures put in place on a global level. The Camozzi Automation Quality Department is responsible for adhering to the quality and environmental legislations, as certified according to the ISO 9001 and ISO 14001 international standards. We aim to ensure total quality throughout all areas of activity and strive to continuously improve.

*Complete and customized solutions
 for industrial automation*

**From concepts
 to customer satisfaction**

A commitment
 to excellence

FOCUS ON MAXIMISING
 CUSTOMER BENEFITS

CONSTANT COMMITMENT
 TO IMPROVING PERFORMANCE

PRODUCTION PLANTS IN ITALY, USA,
 RUSSIA, UKRAINE, CHINA AND INDIA

BRANCHES, DISTRIBUTORS
 AND SUPPORT CENTRES IN MORE
 THAN 75 COUNTRIES

Since 1964, Camozzi Automation has specialised in the field of pneumatic automation. Our product range has been constantly and we now design and manufacture a comprehensive range of highly advanced components and systems. Our objective is to satisfy our customers' needs through the provision of innovative and high quality solutions, which are produced using optimised production processes and supported by excellent pre and post sales assistance. The passion and enterprising nature of the company's founders, the Camozzi brothers, has always guided

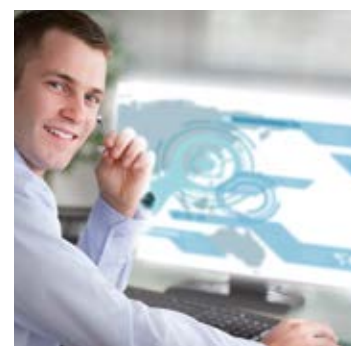

the business, leading to sustained growth and a global presence. One of our guiding philosophies is to be close to our customers throughout the world as we believe this is fundamental in the building of successful partnerships. It is through these close customer partnerships that we provide quality components which are in accordance with local regulations and standards. Every product and solution offered is fully supported through our global infrastructure, which ensures we are proactive in providing solutions and quick to meet the needs of every customer.

We design and produce fully integrated systems to meet your exact pneumatic automation requirements

We add value to your solution through our project teams

Our project teams work to deliver excellence to every customer. This is achieved through the building of strategic partnerships that ensure success. Cooperation is our key word, from the customer needs analysis and the design concept through to the system build and the actual delivery of the completed automation system.

- **Customer needs analysis**
Analysis of the requirements.
- **Project definition**
Analysis of applications and specifications.
- **Engineering**
Combining mechanics, electrical connections and electronics; including product selection.
- **Design**
Optimized solutions for all involved technologies.
- **Operation Planning**
Resources scheduling; procurement of components; documentation.
- **Processing**
Machined components.
- **Assembly**
Cabinet design and assembly.
- **Tests**
Functional tests, validation and certification.
- **Delivery**
Automated warehouses and distribution networks worldwide.
- **After Sales Assistant**
Customer support for installation and maintenance.
- **Evaluation of Customer Satisfaction**
Continuous improvement of Customer Care through CRM system.

Pre-assembled kits

Highly reliable solutions, ready to perform

With Camozzi's experience, pre-assembled solutions can be provided which reduce installation time. Maintenance time and costs are also reduced due to the high reliability of each solution.

- **Simple to order**
- **Fast delivery**
- **Easy to use**
- **Ready to perform**

Special products

Compact integrated customized Technical Solutions

Our "Lean Philosophy" enables us to ensure production flexibility whilst the extensive technical knowledge residing at the Mechatronic Application Research Center (MARC) means we are fully equipped to deliver customized solutions which are developed by working closely with each customer. When designing components our focus is always on performance and the optimization of dimensions. It is this focus that enables us to deliver compact fluidic modules and circuits that guarantee high speed, excellent flow, low consumption, lightweight and clean design.

- **Testing imposed loads**
- **Mechanical strength tests using various pressure levels**
- **Products used in explosive zones**

Control cabinets and systems

Quality of components, the Strength of the System

Complete turnkey projects to give the best SOLUTION for the control of your application. Integration of electrical and pneumatic components designed to assure the optimization of the entire system.

- **Plastic or metal panels with a large range of colours**
- **Compact design**
- **Custom size**
- **Pre-cabled systems**
- **Respect of industry standards and norms**
- **High performing components**
